Cleaire Advanced Emission Controls Names Dr. Brad Edgar as President

SAN LEANDRO, CA, (March 4, 2008) – Cleaire Advanced Emission Controls, a leading manufacturer of high-quality diesel emission control devices, today named Dr. Brad Edgar as its new President.

“We are excited to have Brad assume responsibility for our growing business,” said Kevin Shanahan, Cleaire’s Chairman and CEO. “Brad has been instrumental in the company’s success and is well prepared for this new role. His strong technical background, coupled with an understanding of the regulatory environment and customer demands, make him perfect for the job.”

Dr. Edgar joined Cleaire as Executive Vice-President and Chief Technology Officer when the company was founded 2001. He earned his Bachelors, Masters and Doctorate degrees in Mechanical Engineering from the University of California, Berkeley.

Cleaire designs and manufactures leading-edge diesel emission control systems which play a significant role in lowering air pollution levels throughout California, North America, and globally. To date, Cleaire has built, sold, and installed more than 5,000 retrofit systems on transit buses, school buses, garbage trucks, utility vehicles, and offroad construction equipment.

California Air Resources Board regulations mandate emission reductions from in-use diesel engines. Cleaire’s technologies meet the highest level requirements of CARB’s strict verification program. Cleaire continues to develop its portfolio of diesel retrofit solutions as part of an over-arching goal to improve air quality.

Cleaire Advanced Emission Controls Names Dr. Brad Edgar as President

Dr. Edgar, who grew up in west Texas, is the inventor or co-inventor of 11 patents focused on combustion science, air pollution, and emission control. He also is the author of numerous technical papers. As an undergraduate at Berkeley, he was a 4-year letterman on the Golden Bears football team and a captain in his sophomore through senior years. Dr. Edgar lives in Oakland with his wife Ankie and their two children, Jackson and Rosi.

About Cleaire

Cleaire Advanced Emission Controls, LLC is a privately held company located in San Leandro, California with manufacturing facilities in San Diego. Cleaire also owns and operates the California Truck Testing Services Laboratory (CaTTS) located at the Chevron Research and Technology Center in Richmond, California. ###

Brad Edgar, Ph.D., named President of Cleaire Advanced Emission Controls.
